**Wool scouring plants in Europe
Poster : 5 euros**

Colour, size 60x40 cm, October 2016.

SCOURING WOOL

WOOL SCOURING IN EUROPE: URGENT AND ECOLOGICAL SOLUTIONS

Wool scouring is the essential intervening step between agriculture, which provides the fleeces, and the craft and textile industries, which make them into finished products. If this stage, already fragile in Europe, is broken then the whole value chain may also disappear. On the initiative of associations *ATELIER-Laines d'Europe, Pôle Laine du Pays de Saugues and Lainamac*, 150 people from 15 European counties, representing all stages of the wool processing industry met in Saugues, Haute-Loire, from 4-6 November, 2015 to share ideas and look for solutions.

The proceedings of the meeting includes the oral presentations, descriptions of various projects, report of debates, local visits, with an annexe including maps, useful addresses and a glossary.

With this publication, we hope you to find a useful work tool. Dissemination at all levels, farming, crafts and industry, local authorities and EU bodies, will allow everyone to participate in the development of the European wool industry and consider his future with optimism.
